TributeWrap™ **NEW**

Ease and comfort within your reach.

Self-adjustable compression foam garment to be used at rest or during the night for the management of lymphoedema or oedema.

TributeWrap™

Promoting skin health with proven foam technology.

TributeWrap is an adjustable compression garment with foam technology that nestles into the tissue to promote skin health¹. It supports easy self-management of lymphoedema and oedema during low activity by comfortably adjusting to your patient's unique shape and lifestyle.

TributeWrap helps maintain gains made during therapy, while allowing the flexibility to support further reduction. Simply slide it on, adjust the straps, and cover with Sleep Sleeve for comfortable evening compression.

TributeWrap™ Wrist to Axilla

Chevron channeling

Designed based on MLD principles of directing fluid to collateral pathways.

Adjustable strapping system

Easily conforms for the right, comfortable fit, and has flexibility to support further reduction.

Supports mobility

Angled straps at flexion points for a comfortable and functional design.

6-month warranty

TributeWrap is guaranteed to be free of material and manufacturing defects for the six-month life of the garment.

“In the morning, I took it off and couldn’t believe the difference! I wondered if this was a fluke, but I’ve noticed the same results every morning!

This is outstanding! It is easier to put on my daytime flat knit garments, and my legs have less fatigue throughout the day.

I am convinced TributeWrap does make a significant difference!”
