Who We Are

Lohmann & Rauscher (L&R) is a leading international supplier of medical devices and hygiene products of the highest quality. We have a broad portfolio of more than 60,000 products and services in the area of wound management, compression bandages & supports, and set-systems & hygiene.

As developer, manufacturer and distributor of healthcare solutions, we substantially contribute to the healthcare sector worldwide. In many countries we are considered to be part of system-relevant infrastructure. The roots of the German company Lohmann and the Austrian company Rauscher date back to the 19th century.

People and their healthcare have been the heart of everything we do for more than 170 years.

L&R is a global leader in the design and production of high-quality medical devices which deliver clinical benefits.

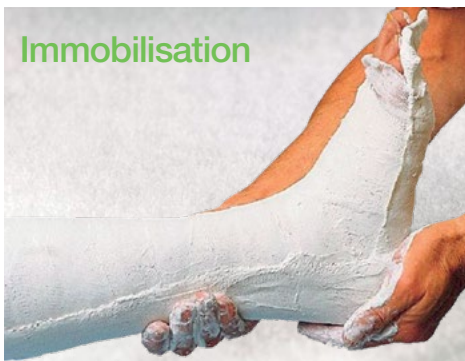

Compression & Bandages

L&R provides a complete range of compression solutions. Well known brands such as **ReadyWrap®**, **Rosidal®** and **VENOSAN®** ensure clinicians and patients are supported throughout their entire compression journey.

Immobilisation

The L&R fracture management range includes products for casting and immobilisation as well as numerous accessories. **Cellona®** and **Cellacast®** are key brands in this specialty.

To learn more about Immobilisation click or scan the QR Code

Wound Care

In the field of wound care, L&R offers scientific expertise and state-of-the-art manufacturing and design.

Leading brands include **Debrisoft®** for debridement and wound bed preparation, the **Suprasorb®** range for advanced wound care and **Vliwasorb® Pro**, a next generation superabsorber.

To learn more about Wound Care click or scan the QR Code

Negative Pressure Therapy (CNP)

L&R's innovative Negative Pressure Wound Therapy (NPWT) products include **Suprasorb® CNP EasyDress** and **Suprasorb® CNP Drainage Film**. These products make NPWT simple and fast while improving treatment success.

Rosidal® TCS

Two component compression system

Product benefits

- Rosidal TCS is made up of:
 - soft compression bandage (Rosidal SC) = first layer
 - cohesive compression bandage (Rosidal CC) = second layer
- Two components combined in a handy, ready-for-use set
- Integrated skin protection in the reusable first layer
- Short-stretch cohesive compression layer provides effective therapeutic compression
- Cohesive quality of the bandage allows for extended rebandaging intervals without slippage for up to seven days
- Offers greater comfort at rest which improves patient concordance and encourages mobility and confidence
- Safe-Loc system: safe to apply at full stretch so no pressure indicators are required. This ensures consistent and accurate application
- Simple and easy to apply
- Thin and supple, allowing good mobility in the ankle joint and shoes can be worn comfortably
- Extensive clinical evidence

Indications

- For the treatment of lower leg ulcers and concomitant conditions
- For the treatment of chronic oedema

Product composition

- First layer = soft compression bandage (Rosidal SC): polyurethane foam with woven textile layer made of 60% polyamide and 40% cotton
- Second layer = cohesive compression bandage (Rosidal CC): 51% cotton, 39% polyamide, 10% polyurethane, with synthetic rubber coating (elastic thread)

To note

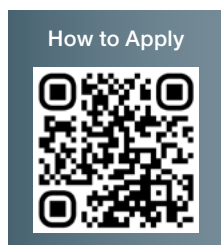

- System is intended for single use
- Therapeutic pressure is maintained over several days
- Latex Free

Rosidal TCS

System components	Size	REF	Shipping units (pcs.)

Rosidal® K

Short stretch bandage

Product benefits

- Textured short stretch bandage
- Non-cohesive
- Easy application
- Air-permeable

Indications

- For compression (e.g. phlebological and lymphatic conditions)
- To immobilise the limbs
- For support and pressure relief in traumatology and sports medicine
- To retain dressings

Product composition

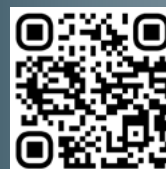

- 100% cotton
- Latex Free 

To note

- Can be washed up to 50 times at maximum 95°C (mild detergent/delicates cycle)

Rosidal® SC

Soft compression bandage

Product benefits

- Helps distribute pressure evenly
- Integrated skin protection layer which provides:
 - Improved comfort and breathability
 - Reduced skin irritation
 - No need for an additional tubular bandage
- Light compression effect
- Reusable
- First layer of Rosidal TCS before Rosidal CC application
- Permeable to air and water vapour

Indications

- Can be used as the first compression layer to protect the skin and to make the bandage less prone to slipping
- For light compression under lymphological or phlebological compression bandages

Product composition

- 60% polyamide, 40% cotton
- Latex Free

To note

- Can be washed up to 50 times at maximum 95°C (mild detergent/delicates cycle)

Rosidal SC

with bandage clips, individually packed in a box

Rosidal® CC

Cohesive compression bandage

Product benefits

- High static stiffness
- Delivers high working, low resting pressure
- Cohesive on both sides
- Safe-Loc system: safe to apply at full stretch so no pressure indicators are required
- Simple and easy to apply
- Top layer of Rosidal TCS

Indications

- To immobilise the limbs
- For the retention of multi-layer bandages
- For compression

Product composition

- 51% cotton, 39% polyamide, 10% polyurethane, with a synthetic rubber coating
- Latex Free

Rosidal CC

6 m (stretched length), individually packed in a box

Size	REF	Shipping units (pcs.)
10 cm x 6 m	33499	1 / 24

contents page

Rosidal® soft Foam bandage

Product benefits

- Lengthwise and widthwise elastic
- Ensures even distribution of pressure to compensate for minor imperfections in bandaging technique (e.g. constriction)
- Increases patient comfort (e.g. cushioning of the tibial crest)
- Reduces slippage
- Highly permeable to air and humidity
- Tear-resistant and stretchable
- Reusable
- Maintains its elasticity and cushioning effect even after washing

Indications

- For padding under lymphological and phlebological compression bandages

Product composition

- 100% polyurethane
- Bandage is latex free. Clips contain latex

To note

- Can be washed up to 50 times at maximum 95°C (mild detergent/delicates cycle)

Rosidal® haft

Cohesive short stretch compression bandage

Product benefits

- Delivers high working, low resting pressure
- Lengthwise elastic (to approximately 60%)
- Textile elastic due to the twisting of the warp threads during weaving
- Stays reliably in place
- Compression force is well tolerated due to the high degree of static stiffness
- High compression is sustained over a longer period
- Cohesive on both sides
- Simple and easy to apply

Indications

- For compression of the limbs (e.g. for phlebological and lymphatic conditions)
- For the treatment of oedema
- After sclerotherapy and varicose vein surgery
- For support and pressure relief of the capsular ligament system

Product composition

- 99% cotton, 1% synthetic thread, with microdot natural rubber latex coating

Rosidal haft

5 m (stretched length), individually packed in a box

Width	REF	Shipping units (pcs.)
6 cm x 5 m	31973	1 / 48
8 cm x 5 m	31974	1 / 32
10 cm x 5 m	31975	1 / 42

Dauerbinde™ K

Long stretch bandage

Product benefits

- Lengthwise elastic (to approximately 175%)
- Easy to apply – even for those who have little experience
- The soft fabric adapts to every contour of the body
- High retractive force
- Very soft, supple & good conformability
- Washable
- Textured fabric structure
- Skin friendly
- Permeable to air

Indications

- For compression therapy (lymphology and phlebology)
- For support and relief of the musculoskeletal system
- To retain dressings
- To immobilise the limbs
- Reduction of haematomas

Product composition

- 58% cotton, 24% polyamide, 8% elastane, 10% viscose
- Bandage is latex free, clips contain latex

To note

- Can be washed 15 times at maximum 95°C (mild detergent/delicates cycle)
- The bandage should be removed at night or when in a resting position due to the high resting pressure

Dauerbinde K

7 m (stretched length), individually packed in a box

Cellona®

Synthetic undercast padding

Product benefits

- High-loft, elastic fibrous web
- Fibres hold tightly together allowing circular application
- Can be gently stretched to reduce width
- Air-permeable
- Polyester fibre is virtually non-absorbent

Indications

- For padding under plaster of Paris and synthetic casts and compression bandages
- As padding material in trauma and sports medicine
- For padding under compression bandages

Product composition

- 100% non-brightened polyester fibres
- Latex Free

Cellona® Shoe

Multifunction protection shoe

The Cellona Shoe is a multifunction protection shoe that can be worn over various types of casts, dressings and bandages. With its intuitive design and durable construction, the Cellona Shoe provides stability, protection and comfort for people with bandaged or immobilised feet.

Measuring and fitting the Cellona Shoe

To determine which Cellona Shoe size is suitable, measure the bandaged or immobilised foot length and circumference (distance around the foot at the mid-foot). Then use the following table to make your selection.

Handy Tips

- The Cellona Shoe size will generally be larger than one's normal (unbandaged) shoe size.
- To prevent tripping, trim the adjustable length of hook-and-loop ankle fastening tape as required using scissors.
- The Cellona Shoe has a built-in closed shoe or open-toe sandal option. To adjust between open-and-closed-toe fit, lift or lower the tongue of the shoe above or below the bandaged or immobilised foot.

The Cellona Shoe consists of:

Shoe sole:

- Outer sole (treadsole): thermoplastic rubber
- Inner sole:
 - Foam layer: polyethylene
 - Board layer: polypropylene/chloroprene rubber adhesive
- Sewing thread: polyester

Uppers:

- Mesh fabric (outside): polyester
- Foam (intermediate layer): polyurethane
- Sewing thread: polyester
- Hook & loop fasteners: polyamide

tg[®] fix

Tubular net bandage

Product benefits

- Wide-mesh knitted fabric
- Two-way stretch
- Can be applied without bunching up
- Less tearing after being cut to size

Indications

- To retain all types of wound/ointment dressing pads
E.g. dressings in hard to dress areas; and/or where adhesives are inappropriate
- To retain splints

Product composition

- 71% polyamide (crinkled),
29% elastodiene (latex),
no optical brighteners

To note

- Washable
- Sterilisable by steam (121°C) and irradiation

tg® grip

Tubular support bandage

Product benefits

- Supple material with uniform compression effect
- Air-permeable
- Light padding effect
- Application with virtually no creases
- Knitted seamlessly
- Widthwise stretch
- Skin-friendly due to high percentage of cotton
- Compression can be enhanced with a second layer of material or by using a smaller size

Indications

- For support and retention with a light compression effect

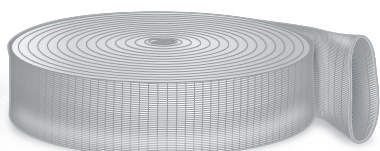

Product composition

- 85% cotton, elastodiene (latex); covered with a polyamide yarn

To note

- Washable up to 60°C and sterilisable by steam (134°C)

tg® soft

Tubular padding bandage

Product benefits

- Soft and very elastic
- Easy to cut to the required size
- Virtually no creasing when applied, skin-friendly
- Conforms to any body contour
- Adheres to the cast
- Highly permeable to water vapour and air
- Low absorption capacity ensures high wearing comfort
- Padding and skin protection in one

Indications

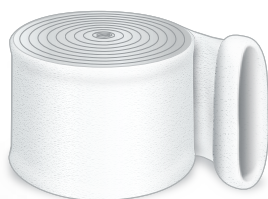

- For padding under plaster and synthetic casts

Product composition

- 85% cotton (unbleached), 15% elastane
- Latex Free

To note

- Especially well suited to be undercast padding for focused immobilisation.

Sama™ Frottee Tubular padding

Product benefits

- Easy to apply
- Soft
- Increased comfort from padding
- Will not crease or wrinkle
- Allows skin to breathe
- Contours to all shapes, sizes and lengths

Indications

- Prevention of skin tears from knocks in geriatric wards or nursing homes
- Keeping a dressing in place on sensitive skin
- To eliminate the need for adhesive tape
- As padding under compression bandages for ulcer care and lymphoedema

Product composition

- 95% cotton, 3% polyamide, 2% elastane

To note

- Reusable, can be washed up to 20 times at 40°C depending on exudation

Komprex™

Foam pads & bandages

Product benefits

- Can be cut to size individually
- Permeable to air and water vapour

Indications

- Komprex Foam Rubber Pads
– for support with functional bandages in sports medicine
- For use in combination with compression therapy
- Komprex Foam Rubber Bandage
– for compression in oedema treatment in phlebology and lymphology
- Use in combination with other compression products to change local pressure

Product composition

- Komprex Foam Rubber Pads:
styrene-butadiene rubber
- Komprex Foam Rubber Bandages:
80% styrene-butadiene rubber

Medical Compression Stockings and Armsleeves

Simple. Effective. Swiss quality.

Return to
contents page

VENOSAN® Compression Stockings help to make life easier in many situations. The pressure VENOSAN Compression Stockings exert promotes healthy veins. They can help to prevent venous disease as well as being an important part of the treatment for patients being treated for acute and chronic venous disorders.

The diverse VENOSAN range offers the right product for a wide variety of needs. All VENOSAN Compression Stockings have the following characteristics in common:

Simple.

The VENOSAN range provides a simple guide to help you determine the correct size, compression class and style of compression stocking.

The wear and care instructions included with VENOSAN Compression Stockings are easy to follow which patients appreciate.

Effective.

VENOSAN Compression Stockings are RAL-certified, meaning that they provide effective therapeutic compression. The effective design of VENOSAN Compression Stockings means that for patients, many will experience enhanced treatment success and improved quality of life.

Swiss quality.

Products from Switzerland are known for excellent workmanship and top quality.

Manufactured using high quality materials, such as the original Lycra® and elastane, VENOSAN Compression Stockings offer wearing comfort and durability.

VENOSAN® 6000 CLASSIC

- Maximum sheerness
- Breathable
- Ease of care

Indications

- CVI (chronic venous insufficiency) 1–2
- Varicose veins
- Varicosis during pregnancy
- After vein surgery

Garment Styles

Composition

70% nylon polyamide
30% elastane

VENOSAN® 7000 NATURAL TOUCH

- High stiffness (resistance)
- Skin-friendly
- Temperature regulation
- Available in Armsleeve style

Indications

- CVI (chronic venous insufficiency) 2–3
- Lipodema stage 2–3
- After vein surgery
- After thrombosis
- PTS (post-thrombotic syndrome)
- Mild lymphoedema
- Marked orthostatic stress

Garment Styles

Composition

62% TACTEL® polyamide
26% elastane
8% cotton
4% Lyocell/SeaCell™

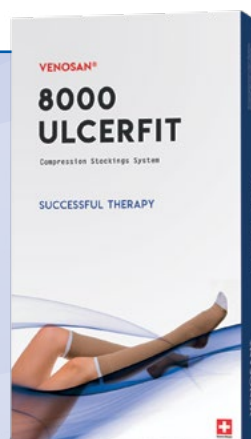

VENOSAN® 8000 ULCERFIT SUCCESSFUL THERAPY

- Two-layer stocking system
- Fast and easy to use
- High wearing comfort
- Liner can be worn at night

Indications

- Treatment of venous leg ulcers
- Helps to prevent recurrence of venous leg ulcers

Version

Composition

Overstocking:
62% TACTEL® polyamide
26% elastane
8% cotton
4% Lyocell/SeaCell™

Liner:
90% polyamide
10% elastane

VENOSAN® SOFT VENOSAN® PRO VENOSAN® STRONG FLAT KNIT THERAPY

- Flat-knit custom made garments
- Smooth and durable
- Low to high stiffness
- Manufactured to european standards

Indications

- Treatment and management of chronic oedema and lymphoedema

Composition

Polyamide & elastane
VENOSAN PRO (CCL II)
& VENOSAN STRONG (CCL 4S)
also contains cotton
VENOSAN PRO also contains Latex

VENOSAN® 3000 COTTON

NATURAL LOOK

Natural and soft on the skin.

Natural

Cotton allows a higher degree of wearer comfort for all those who prefer a natural fibre against the skin, or who are allergic to synthetic fibres. Cotton fibre against the skin.

Durable

The construction ensures the compression stocking is durable and hard wearing making it ideal for long-term compression therapy.

Easy to don

The stretchable knitted cotton fabric allows easy donning of the compression stocking.

Made to Measure available

RAL certified

Beige

Garment Styles

Indications

- CVI 2–3 (chronic venous insufficiency)
- Lipoedema stage 2–3
- Post vein surgery
- PTS (post-thrombotic syndrome)
- Mild lymphoedema

Composition

- CCL 2: 49% cotton, 27% nylon polyamide, 24% elastane
- CCL 3: 40% cotton, 27% nylon polyamide, 33% elastane

VENOSAN® 4000

CLIMATE EFFECT

Microfibre - fine and stylish.

Climate effect

The air permeable yarns and knitting construction of this stocking allow for moisture to be wicked away from the skin and through the stocking.

Fashionably elegant

Wearable in all seasons. It has a contemporary stylish look, with the sheer transparency.

Comfortable

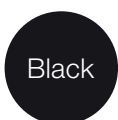

The velvety touch of the high tech TACTEL® microfibrres offers outstanding comfort. The microfibrres are many times thinner than a human hair.

Supports self-care

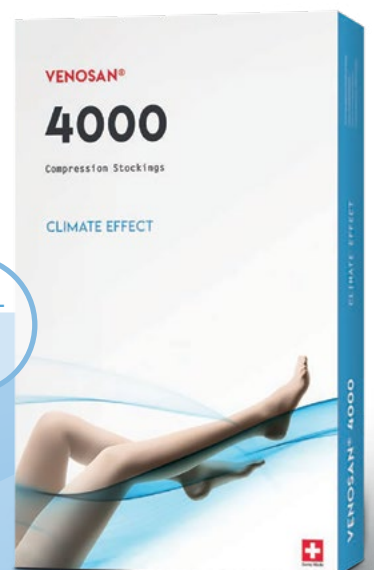

Easy to put on and take off with its stretchable construction.

Made to Measure available

RAL certified

Tactel®

Garment Styles

Indications

- CVI 1 (chronic venous insufficiency)
- Pregnancy-induced varicose veins
- Milder symptoms
- Post vein surgery

VENOSAN® 5000

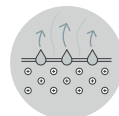

THE MAGIC OF SILVER

For ideal temperature regulation.

Durable

The innovative yarn combination of silver and cotton make this stocking suitable for active men and women.

Regulates temperature

Silver is well known for its excellent heat conductive properties. In combination with the microfibre TACTEL®, silver produces rapid dissipation of skin moisture, helping to ensure optimal wearing comfort.

Silver-coated X-Static® fibres

Presents the unique benefits of silver with its silver-coated X-Static® yarn directly against the skin. No reduction of the properties of silver even after 150 washing cycles.

Anti-static

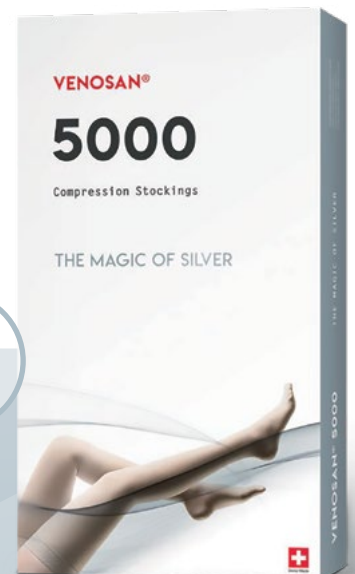

Conducts static electricity charges away from everyday clothing with its silver-coated X-Static yarn.

Made to Measure available

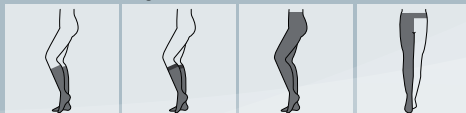

RAL certified

Tactel®
X-static®

Garment Styles

Indications

- CVI 1–2 (chronic venous insufficiency)
- Post vein surgery
- Mild skin conditions
- Lipoedema stage 1

Composition

- 40% TACTEL® polyamide
- 30 % elastane
- 20 % cotton
- 10 % polyamide / silver X-Static®

VENOSAN® 6000

CLASSIC

Reliable and cost-effective.

Simple construction

Designed with common highly elastic yarns for an affordable option that meets clinical needs.

Anatomically knitted

For maximum comfort, does not slip.

Ease of care

Can be machine washed at 40°C on a delicates programme. Dries naturally overnight.

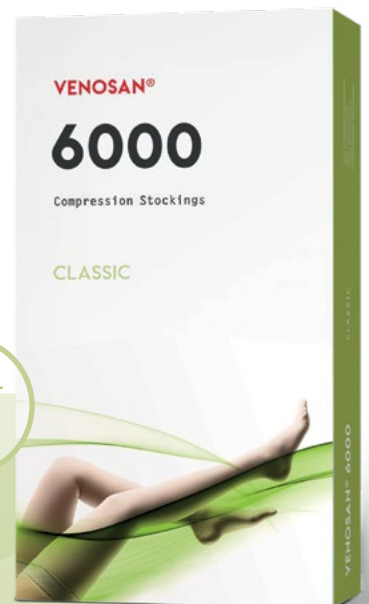

Classic appearance

Slight transparent construction for everyday wear.

RAL certified

Black

Beige

VENOSAN® 7000

NATURAL TOUCH

High stiffness with optimal comfort.

High stiffness

Due to the enhanced stiffness the stockings provide a massage effect and are characterised as shaping, opaque compression stockings with high stiffness — comparable to Rosidal® K short stretch bandages.

Skin-friendly

Combines organic SeaCell®, TACTEL® microfiber, and cotton yarns for a comfortable garment experience.

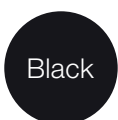

Natural SeaCell® fibres

Designed with unique organic substances found in seaweed known to help activate cell regeneration to support skin health, relieve skin diseases, reduce inflammation, and soothe itchiness.

Strong natural fibres

Provides high durability from its strong seamless knit structure with two-way stretch, these stockings are suitable for people who demand a lot from their stockings at work, in sports and in their leisure time.

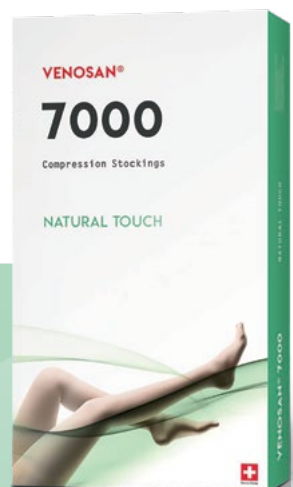

Tactel®

Made to Measure
available

RAL certified

Garment Styles

Indications

- CVI 2–3 (chronic venous insufficiency)
- Lipoedema stage 2–3
- Following acute thrombosis (following dressing)
- Post vein surgery
- PTS (post-thrombotic syndrome)
- Mild lymphoedema
- Marked orthostatic stress

Composition

- 62% TACTEL® polyamide
- 26% elastane
- 8% cotton
- 4 % Lyocell/SeaCell™ (seaweed fibre)

VENOSAN® 8000 ULCERFIT

SUCCESSFUL THERAPY

Compression Stocking System.

Two layer system

Offers optimum therapy thanks to the ideal combination of liner and overstocking.

Time saving treatment

Fast and easy to use, patient can apply the system without assistance.

Better patient compliance

High wearer comfort. The flat and thin surface of the liner ensures easy donning and doffing of the overstocking.

RAL certified

Beige

Tactel® SeaCell™

Version

Indications

- Treatment of venous leg ulcers
- Helps to prevent recurrence of venous leg ulcers

Composition

Overstocking: VENOSAN 7000

- 62% TACTEL® polyamide
- 26% elastane
- 8% cotton
- 4% Lyocell/SeaCell™

Liner:

- 90% polyamide
- 10% elastane

VENOSAN® 4000 Armsleeves

CLIMATE EFFECT

Microfibre - fine and stylish.

Climate effect

The air permeable yarns and knitting construction of this stocking allow for moisture to be wicked away from the skin and through the stocking.

Fashionably elegant

Wearable in all seasons. It has a contemporary stylish look, with the sheer transparency.

Comfortable

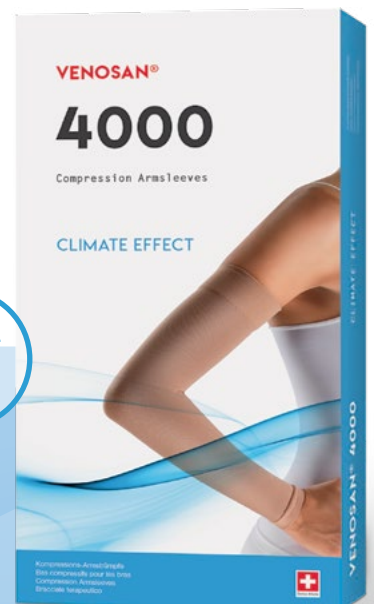

The velvety touch of the high tech TACTEL® microfibrres offers outstanding comfort. The microfibrres are many times thinner than a human hair.

VENOSAN® 7000 Armsleeves

NATURAL TOUCH

High stiffness with optimal comfort.

High stiffness

Due to the enhanced stiffness the stockings provide a massage effect and are characterised as shaping, opaque compression stockings with high stiffness — comparable to Rosidal® K short stretch bandages.

Skin-friendly

Combines organic SeaCell®, TACTEL® microfiber, and cotton yarns for a comfortable garment experience.

Natural SeaCell® fibres

Designed with unique organic substances found in seaweed known to help activate cell regeneration to support skin health, relieve skin diseases, reduce inflammation, and soothe itchiness.

Strong natural fibres

Provides high durability from its strong seamless knit structure with two-way stretch, these stockings are suitable for people who demand a lot from their stockings at work, in sports and in their leisure time.

VENOSAN® SILVERLINE EVERYDAY COMFORT

SILVERLINE® offers long-lasting protection from foot odour and athlete's foot.

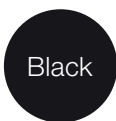

X-Static®, the silver fibre, promotes hygiene and anti-microbial properties. Skin remains deodorised and free of bacteria and fungus — particularly effective in protecting against foot odour and athlete's foot. Cool and dry in summer and warm in winter, SILVERLINE® fibres wick moisture away from the skin for comfort in warm weather. X-Static®, the silver fibre, conducts heat in winter to retain warmth. The silver in X-Static® yarns also assists in eliminating static electricity.

Specifically designed

- Enhanced comfort and fit with knitted top band.
- Elimination of bacteria and fungus associated with foot odour.
- Excellent regulator of heat.

VENOSAN® SPORTSLINE PERFORMANCE SUPPORT

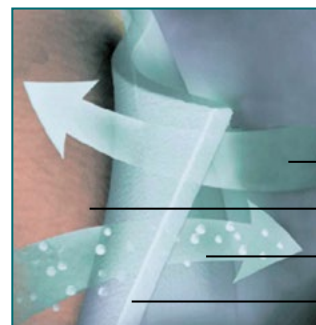

VENOSAN SportsLine is a graduated compression support sock for active men and women. COOLMAX® draws moisture away from the skin and helps regulate the body temperature to keep you cool.

Why COOLMAX®?

COOLMAX® is the original performance fabric that has been helping top athletes push harder and longer but is now being discovered for the cool comfort it brings to everyday apparel.

- Cushioned comfort sole with extra padding support.
- Wide toe box or roomy comfort.
- Easy to put on.

VENOSAN® AES

THROMBOSIS AND EMBOLISM PREVENTION

The VENOSAN AES range comprises a comprehensive selection of well fitting anti thrombosis stockings.

AES stockings work by ensuring constantly decreasing pressure from the ankle region to the knee or thigh, thereby accelerating venous return for patients in the lying position, and helping to prevent thrombosis as a result.

VENOSAN AES stockings are available in three versions: AD, AGH, AGG.

Properties

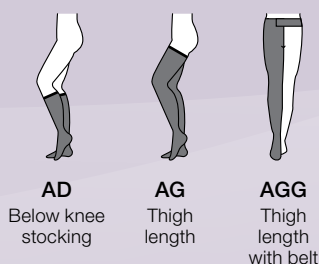

- Light and air-permeable to ensure maximum comfort.
- Easy to put on.
- Anatomical shaping and comprehensive choice of size.
- Ensuring constantly decreasing pressure from the ankle to the knee or thigh, thereby accelerating venous return in patients in the supine position and helping to prevent thrombosis.
- Top inspection window for safety.
- Can be washed and reused.
- Colour coding at the toes and top seam allows immediate identification of the size.

Colour

White

Garment Styles

Indications

- To prevent thrombosis and embolism before, during and after surgeries.
- General immobility, confinement to bed.
- Before, during and after childbirth.

Composition

AD / AG:
91% nylon polyamide
9% LYCRA® elastane
AGG:
89% nylon polyamide
11% LYCRA® elastane

ReadyWrap®

Adjustable compression garments

Provides
30-50mmHg¹
resting
pressure*

ReadyWrap is an adjustable compression wrap that provides patients and their caregivers an easy-to-use solution to support wound healing and oedema management.

ReadyWrap provides clinically effective compression therapy while supporting patient compliance with its unique alternating strapping system.

Product Benefits

A Low-stretch material

Mimics short-stretch bandaging — the gold standard of treatment.

B Colour-coded straps

Provides easy step-by-step donning guidance.

C 50% overlapping straps

Helps prevent gapping.

D Blocked support spine

Helps maintain garment form to support all-day wear.

E Foam padding

Cushioning at elbow and wrist provides comfort and evenly distributes pressure.

Modular design

Garments work effectively on their own or in combination.

Tribute® Wrap

Self-adjustable foam compression garment

Tribute Wrap is an adjustable compression garment with foam technology that nestles into the tissue to promote skin health.

It supports easy self-management of lymphoedema and oedema during low activity by comfortably adjusting to your patient's unique shape and lifestyle. Tribute Wrap helps maintain gains made during therapy, while allowing the flexibility to support further reduction.

Simply slide it on, adjust the straps, and cover with Sleep Sleeve for comfortable evening compression.

Product Benefits

Chevron channeling

Designed based on MLD principles of directing fluid to collateral pathways.

Proven foam technology

Breaks up and softens hardened fibrotic tissue to support skin health.

Adjustable strapping system

Easily conforms for the right, comfortable fit.

Easy-to-pull finger grip

Simple pull function to support self-management.

Powered by COOLCORE®

Innovative interior fabric with chemical-free cooling power which rapidly wicks away sweat and moisture to regulate body temperature.

Supports mobility

Angled straps at flexion points for a comfortable and functional design.

Colour

POWERED BY COOLCORE

Additional Compression Garments

Caresia™

Off-the-shelf foam bandage liner

Caresia is an off-the-shelf foam bandage liner designed to simplify and enhance compression bandage techniques by replacing the need for traditional padding or under layers. It is to be used during the intensive phase of therapy to simplify the multi-layer bandaging process during the daytime, nighttime, and high or low activity.

Product Benefits

Saves time

Eliminates the underlayers of bandaging. Slide on and apply short-stretch bandaging over top.

Proven foam technology

Breaks up and softens hardened fibrotic tissue to support skin health.

Quick and easy fitting

Only 2–5 measurements needed to select size for each style.

High-stretch fabric

Offers greater range of motion compared to multi-layer bandages.

Indications

- Lymphoedema - when used with bandages/other garments
- Oedema (non-blood related) - when used with bandages / other garments

Composition

- Polyurethane, nylon (polyimide), spandex (elastane), polyester
- Latex Free

Colour

Blue

Apply Rosidal® K over Caresia to achieve the desired compression profile

SwellSpots™

Oedema and fibrosis pads

Colour

Slate

POWERED BY COOLCORE

Apply Rosidal® K over SwellSpots to achieve the desired compression profile

Rosidal® K
Short-stretch
bandage

SwellSpots are reusable therapeutic foam pads to incorporate into multi-layer bandaging or garments to provide focal compression to help soften troublesome areas of oedema and fibrosis.

Ideal for difficult areas of oedema, fibrosis, skin folds, misshapened limbs as well as padding and protection.

Product Benefits

Proven foam technology

Breaks up and softens hardened fibrotic tissue to support skin health.

Versatile shapes and sizes

Wide range of off-the-shelf and custom solutions to manage troublesome areas no matter the location.

Channelling

Designed based on MLD principles of directing fluid along lymphatic pathways.

Reusable pads

Durable construction ensures pads retain their shape between washes.

Easy care

Suitable for machine washing and drying.

Powered by COOLCORE®

Innovative interior fabric with chemical-free cooling power which rapidly wicks away sweat and moisture to regulate body temperature.

Indications

- Lymphoedema (when used with bandages, e.g. Rosidal K / other compression systems, e.g. ReadyWrap)
- Oedema (when used with bandages, e.g. Rosidal K / other compression systems, e.g. ReadyWrap)

Composition

- Polyurethane, polyester, nylon (polyamide), spandex (elastane)
- Latex Free

Additional Compression Garments

ExoSoft™

Off-the-shelf circular knit compression garments

Colour

ExoSoft is an off-the shelf **circular-knit** gradient compression garment designed for self-management during the day or high activity.

Product Benefits

- Excellent breathability
- Soft and smooth
- Lightweight, breathable microfibre fabric helps keep patients cool, dry and comfortable
- Easy for patients to don
- Wide bands help reduce rolling and keep garment in place
- Armsleeve available with silicone top band
- Easy garment care in washer and dryer

Indications

- Helps maintain reduced volume and shape by supporting extremities
- Management of mild to moderate lymphoedema
- Management of mild to severe oedema (non-blood related)

Composition

- Arm: Nylon (polymide), spandex (elastane), Silicone
- Glove: Nylon (polymide), spandex (elastane), Lyocell
- Latex Free

VENOSAN®

Measuring Guide

When? Where possible, it is recommended to measure in the morning, when legs are rested and swelling is at a minimum.

How? Measurements to be taken using a tape measure (cm only) with the patient standing. For below knee garments, the patient can be measured when sitting. It is recommended that measurements are taken on a bare leg.

Measuring points

Which measurements are needed

Measuring Instructions

Leg Measurements

Measuring points B-D can be done with patient sitting or lying. The Measurements shall be taken on the patient standing with the legs as rested as possible, ideally first thing in the morning.

- cG Two fingers/4cm below Gluteal Fold for circumference
- ℓG Two fingers/4cm below Gluteal Fold to ground for length
- cF Mid Thigh for circumference
- ℓF Mid Thigh to ground for length
- cE Top of kneecap for circumference to avoid being tight at knee pit area
- ℓE Middle of Kneecap to ground for length
- cD Two fingers/4cm below Popliteal Fossa for circumference
- ℓD Two fingers/4cm below Popliteal Fossa to ground for length
- cC Widest part of Calf for circumference
- ℓC Widest part of Calf to ground for length
- cB1 Where Calf starts for circumference
- approximately 6-8cm above point B
- ℓB1 Where Calf starts to ground for length
- cB Smallest part of the ankle, above Malleolus for circumference
- ℓB Smallest part of the ankle, above Malleolus to ground for length
- cY Measured around the heel and the instep at 90 degree symbol dorsiflexion

Foot Measurements

- cA Around base of toes for circumference at the widest part of the foot. Always in standing position, weight bearing.
- ℓA Back of heel to base of toes
- IZ **Closed Toe:** Back of heel to tip of longest toe (Total length of foot)

Scan QR Code for
the lower extremity
measuring guide
video.

Panty Section Measurements

Ask patient to put their hands on their waistline

- cT Waist circumference
- cH Largest circumference around the hips or stomach

Measure the following length along contours of body

- ℓGT front Waist across tummy to crotch
- ℓGT back Waist to 5cm/ three fingers below gluteal fold
- ℓT Bottom edge of heel to waist
- ℓK Bottom edge of heel to crotch

Options

Silicone band: Helps keep garment in place.

Elastic dots/band: makes top edge more firm. Does not prevent garment from slipping down. No length adjustments required for silicone or elastic bands.

T-Heel: can prevent rubbing or a crease indentation on the anterior ankle. Standard option in VENOSAN Strong garments.

Toe box: area for the toes can be extra wide, extra long, extra wide & long, or extra short.

Plain or lace top band: 5cm option on ADH, always 5cm on AG.

Inside out: band can be finished inside out

NOTE:

- All measurements in cm
- c = circumference, ℓ = length
- Unless specified, all length measurements should be longitudinal and should not follow body contours
- Made to measure stockings cannot be returned. The orderer is liable for incorrect information.

VENOSAN®

Measuring and Sizing Guide for Arm Compression Stockings

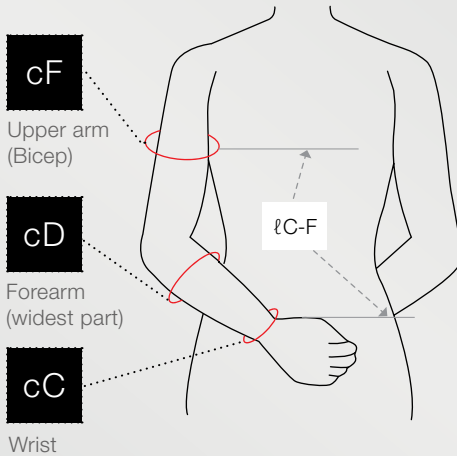

When?

It is recommended to measure the arm when it is in a relaxed position. The length is measured on the outstretched arm.

How?

Measurements to be taken using a tape measure (cm only).

Measuring Points

Sizing Guide

Circumference wrist

	Small (cm)	Medium (cm)	Large (cm)	X-Large (cm)
cC	14 – 17	17 – 20	20 – 23	23 – 26

Circumference forearm

	Small (cm)	Medium (cm)	Large (cm)	X-Large (cm)
cD	22 – 26	26 – 30	30 – 34	34 – 38

Circumference upper arm

	Small (cm)	Medium (cm)	Large (cm)	X-Large (cm)
cF	24 – 30	30 – 36	36 – 42	42 – 48

Length

	Short (cm)	Long (cm)
Wrist (C) to axilla (G)	35 – 45	40 – 50

For arm sleeves CG and ZG

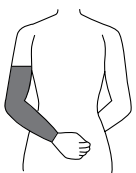

Measure the circumference of the narrowest part of wrist **cC** of widest part of the forearm **cD** of the widest part of the upper arm around the bicep **cF** and the arm length **lC-F**.

Arm Measurements

Measure the arm with palm facing upwards.
Mark the various measuring points on the
inside of the arm.

Circumferences

Circumference measurements are taken with a slight bend
in the elbow (approx. 150 degrees).

- cC** Narrowest part of the wrist. Measure loosely.
- cD** Mid forearm. The widest part of the arm between points
C and E.
- cE** Elbow. Circumference around elbow.
Slight bend (approx. 150 degrees).
- cF** Middle of the upper arm. Approximately half way between
E and G.
- cG** Upper arm in the axillary fold. This is the top of the garment
beneath the axilla. To determine correct location it may be
helpful to wrap a magazine or thick piece of paper around
the arm, under the axilla. The top of the magazine or paper
will be point G.

Lengths

Length measurements should be taken on the inside of an
outstretched arm.

- lD** Length from C to D
- lE** Length from C to E
- lF** Length from C to F
- lG** Length from C to G

Options

Silicone band: Helps keep garment in place

Oblique G: Garment is finished on an angle.

Hand Measurements

Fingers should be spread when measuring the hand.
Mark points A, B and C on the palm side of the hand
in the middle.

Circumferences

- cA** Around MCP heads. The widest part.
- cB** Base of the thumb/thumb web space.
Runs parallel to point A.
- cC** Narrowest part of the wrist. Measure loosely.
- cC¹** Record circumference of where gauntlet will finish.
Most commonly 6-8cm from C.
- cZ** Circumference at the distal point on the thumb where
the thumb covering will end. It is recommended to
avoid locating point Z on the IP joint.
- cX** Circumference at the base of the thumb.
Take an oblique measurement over the base
of the thumb joint.

NOTE: C-C¹ is manufactured with no additional compression

Lengths

- lA-B** Length from A to B ensuring hand is outstretched
- lA-C** Length from A to C ensuring hand is outstretched
- lA-C¹** Length from A to C¹, where the gauntlet will finish.
Commonly an additional 6-8cm to lA-C length
- lZ-X** Length from Z to X

VENOSAN® flat knit

Lower Extremity

Measuring Instructions

NOTE:

- All measurements in cm
- **c** = circumference, **l** = length
- Unless specified, all length measurements should be longitudinal and should not follow body contours

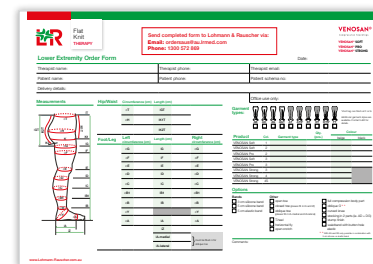

Leg Measurements

Measuring points B-D can be done with patient sitting or lying.
Above E to be measured with patient standing.

- cG** Two fingers/4cm below Gluteal Fold for circumference
- lG** Two fingers/4cm below Gluteal Fold to ground for length
- cF** Mid Thigh for circumference
- lF** Mid Thigh to ground for length
- cE** Top of kneecap for circumference to avoid being tight at knee pit area
- lE** Middle of Kneecap to ground for length
- cD** Two fingers/4cm below Popliteal Fossa for circumference
- lD** Two fingers/4cm below Popliteal Fossa to ground for length
- cC** Widest part of Calf for circumference
- lC** Widest part of Calf to ground for length
- cB1** Where Calf starts for circumference
- approximately 6-8cm above point B
- lB1** Where Calf starts to ground for length
- cB** Smallest part of the ankle, above Malleolus for circumference
- lB** Smallest part of the ankle, above Malleolus to ground for length
- cY** Around Instep and Heel with foot dorsiflexed for circumference

Foot Measurements

- cA** Around base of toes for circumference.
Always in standing position, weight bearing.
- lA** **Horizontal finish:** Back of heel to base of toes for desired length
- Oblique finish:**
- lA medial** From the back of the heel to the base of large toe
- lA lateral** From the back of the heel to the base of small toe
- lZ** **Closed Toe:** Back of heel to tip of longest toe
(Total length of foot)

Lower Extremity order form

Panty Section Measurements

Ask patient to put their hands on their waistline

- cT** Waist circumference
- cH** Largest circumference around the hips or stomach

Measure the following length along contours of body

- lGT** Waist to 5cm/three fingers below Gluteal Fold
- lK¹T** Front length from centre of waist (T) to 5cm above Gluteal Fold applying gentle pressure
- lK²T** Length at the back from the waist (T) over the buttocks to the Gluteal Fold while applying gentle pressure and following contours

Options

Silicone band: Helps keep garment in place.

Elastic band: makes top edge more firm. Does not prevent garment from slipping down. No length adjustments required for silicone or elastic bands.

T-Heel: can prevent rubbing or a crease indentation on the anterior ankle. Standard option in VENOSAN Strong garments.

Oblique G: Garment is finished on an angle.

Curved knee: Knee area knitted in a bent position.

Stocking in 2 parts: No additional measurements needed. The overlap will provide no additional pressure. Overlap is 7cm in length, if you do not state otherwise.

Stump finish: garment enclosed at end of garment to support base of stump.

Waist with button hole elastic: Waist band of panty section with button hole elastic to tighten around waist.

ReadyWrap® Measuring Guide

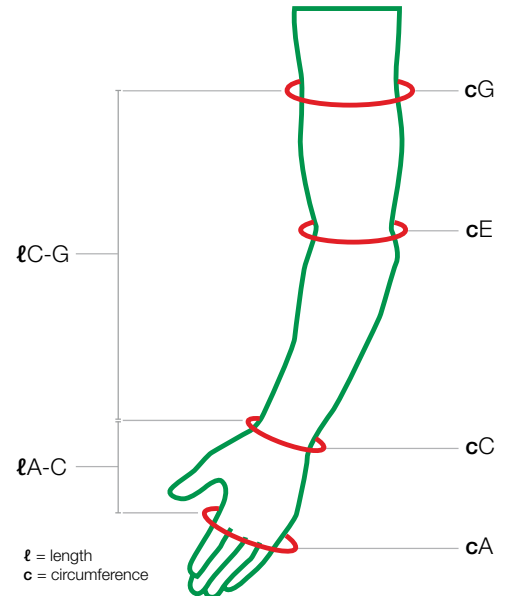

Upper Extremity

Circumference points:

- cG** top of the arm, just below the axillary crease
- cE** round the elbow joint and into the crease of the elbow
- cC** narrowest point of the wrist
- cA** around the metacarpal bones, around the base of the fingers

Lengths:

- ℓC-G** the length between point cC and point cG
- ℓA-C** the length between point cA and point cC

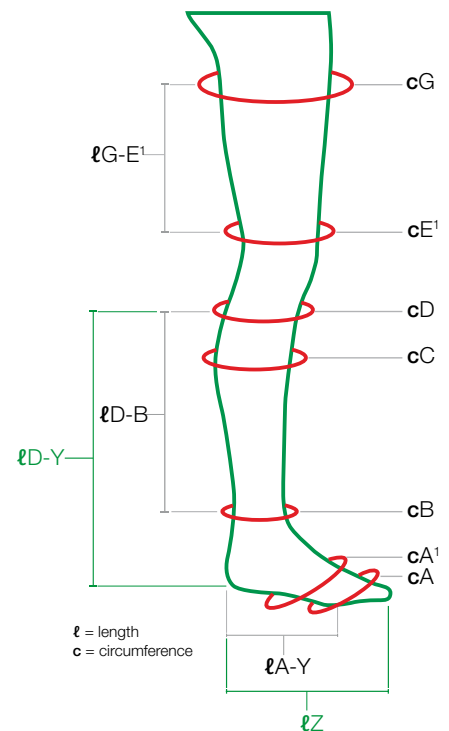

Lower Extremity

Circumference points:

- cG** 2 cm below gluteal fold
- cE¹** 5 cm above the knee
- cD** 2-3 cm below popliteal fossa
- cC** widest part of calf
- cB** 2 cm above malleolus
- cA¹** around the arch/dorsum of the foot
- cA** around base of toes

Lengths:

- ℓG-E¹** the length between point cE¹ (5 cm above the knee) and point cG
- ℓD-B** the length between point cB and point cD
- ℓA-Y** heel to base of toes
- ℓZ** heel to the tip of the longest toe (Fusion Liner only)
- ℓD-Y** bottom of the heel to point cD (Fusion Liner only)

Tribute® Wrap, Caresia™, Exo Measuring Guide

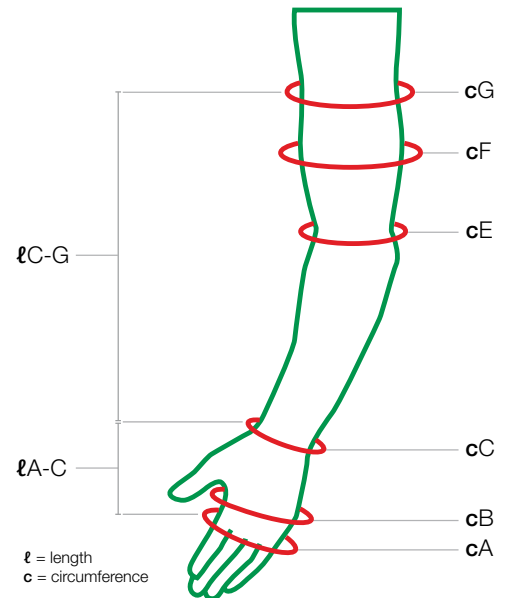

Upper Extremity

Circumference points:

- cG** top of the arm, just below the axillary crease
- cF** widest part of the bicep
- cE** round the elbow joint and into the crease of the elbow
- cC** narrowest point of the wrist
- cB** widest width of the palm, below the metacarpal phalangeal joints
- cA** around the metacarpal bones, around the base of the fingers

Lengths:

- ℓC-G** the length between point cC and point cG
- ℓA-C** the length between point cA and point cC

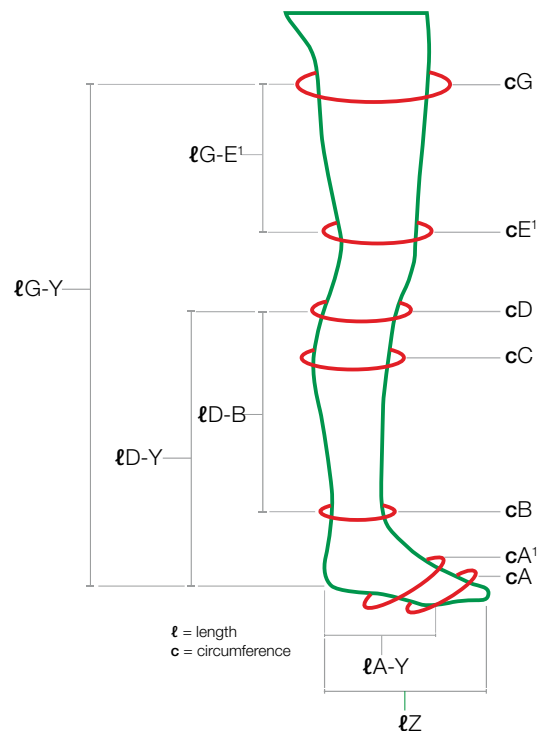

Lower Extremity

Circumference points:

- cG** 2 cm below gluteal fold
- cE¹** 5 cm above the knee
- cD** 2-3 cm below popliteal fossa
- cC** widest part of calf
- cB** 2 cm above malleolus
- cA¹** around the arch/dorsum of the foot
- cA** around base of toes

Lengths:

- ℓG-Y** heel to point cG
- ℓG-E¹** the length between point cE¹ (5 cm above the knee) and point cG
- ℓD-Y** bottom of the heel to point cD
- ℓD-B** the length between point cB and point cD
- ℓA-Y** heel to base of toes
- ℓZ** heel to the tip of the longest toe

Sustainability

Because actions
count.

As a large corporate group we are very aware of our responsibility to our employees, our customers and to society in general. This is why we consider both our commitment to environmental and social causes and our training and education efforts to be a natural part of our business activities.

Financial Sustainability

Ecological Sustainability

Social Sustainability

Because actions count – Sustainability at L&R

L&R is a sustainably run company. Our commitment is reflected in the three pillars of sustainability which are manifested as binding guidelines in our corporate strategy as well as in many projects and long-term initiatives.

The L&R Group has a long tradition of sustainable actions and corporate responsibility. Based on our brand values, we balance our responsibility to be financially successful with our responsibility to the environment, our employees and society at large.

In the **L&R Sustainability Report** we transparently describe our commitment in these areas. In addition, in terms of our corporate strategy for sustainability we continually refine the areas where we are actively in dialogue with our internal and external contacts.
